        <option>2</option>
        <option>3</option>
        <option>4</option>
        <option>5</option>
    </select>

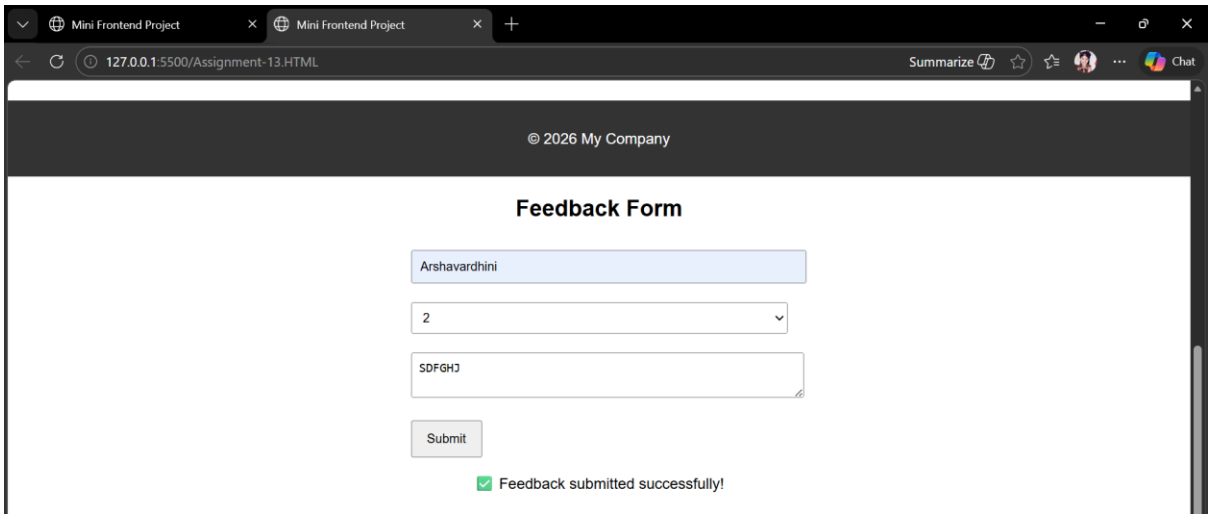
    <textarea id="comments" placeholder="Comments"></textarea>

    <button type="submit">Submit</button>
</form>

<p id="formMsg" style="text-align:center;"></p>

<script>
function validateForm(){
    let user = document.getElementById("username").value;
```

OUTPUT:



OBSRVATION:

alidates required fields

Dynamic error/success messages

Improves usability and prevents empty submissions

TASK-4

PROMPT:

<!-- AI Prompt:

"Create an image gallery with next/previous buttons using JavaScript and make it responsive."

-->

CODE:

```html
<html lang="en">
<body class="light">
<!-- ================= TASK 4 ================= -->
<!-- AI Prompt:
"Create an image gallery with next/previous buttons using JavaScript and make it responsive."
-->

<h2 style="text-align:center;">Image Gallery</h2>

<div class="gallery">
    <img id="galleryImage" src="">
    <br>
    <button onclick="prev()">Prev</button>
    <button onclick="next()">Next</button>
</div>

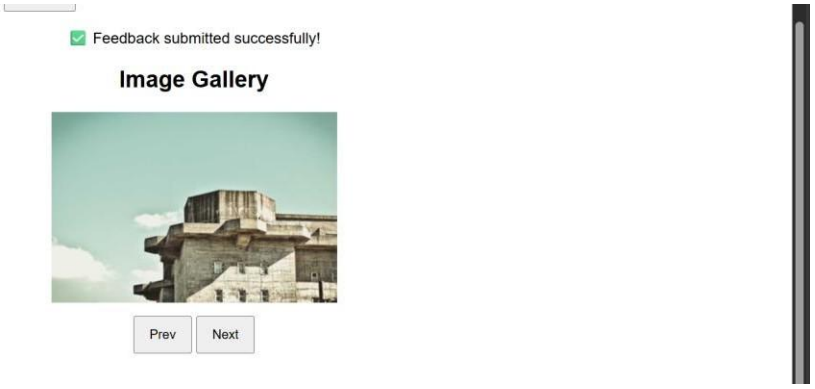
<script>
let images = [
    "https://picsum.photos/id/101/300/200",
    "https://picsum.photos/id/102/300/200",
    "https://picsum.photos/id/103/300/200"
];

let index = 0;

function showImage(){
    document.getElementById("galleryImage").src = images[index];
}

function next(){
    index = (index + 1) % images.length;
```

OUTPUT:



OBSRVATION:

Images loaded dynamically using JS array Navigation buttons improve interaction

Responsive layout ensures mobile compatibilit

TASK-5

PROMPT:

<!-- AI Prompt:

"Create a notification banner with smooth show/hide animation using JavaScript and CSS."

-->
