ASSIGNMENT - 16

NAME: R.Teeneswari

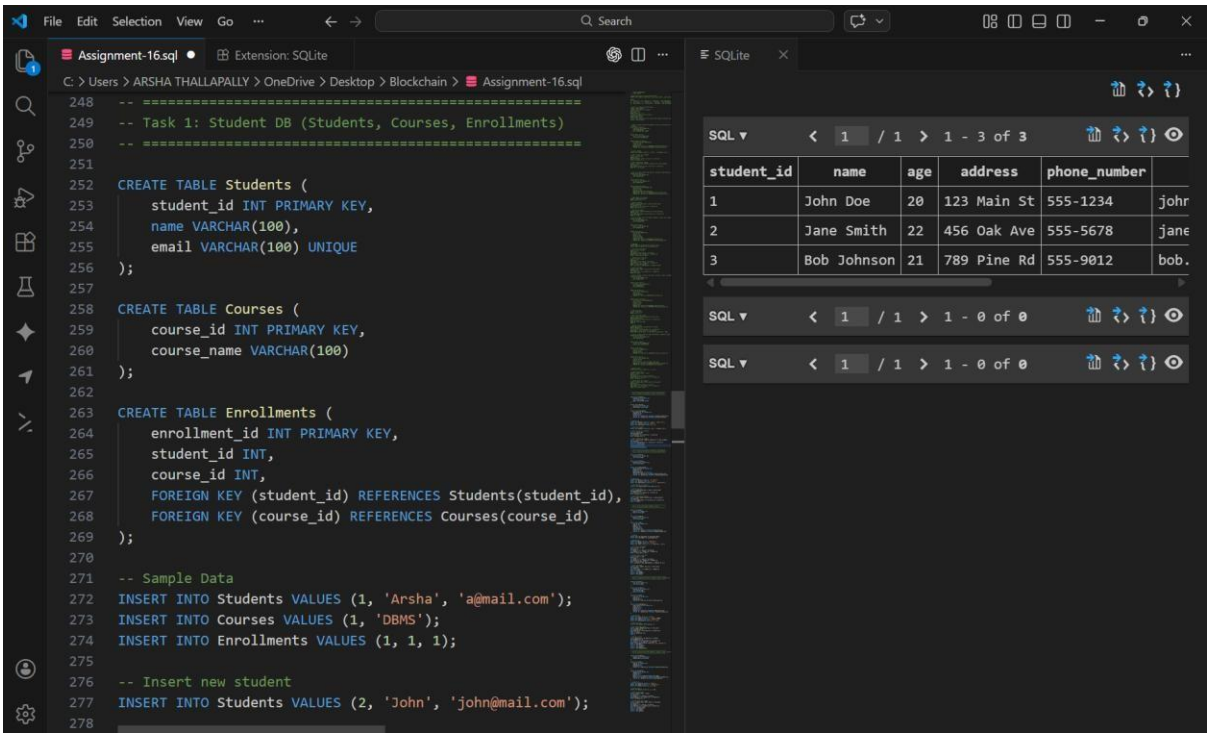
HL-NO: 2303A51932 **BATCH:** 30

Lab 16:

Task-1 :

PROMPT - -Design Student DB (Students, Courses, Enrollments) with PK/FK and queries for insert, student courses, and course-wise count

CODE:



OBSERVATION:

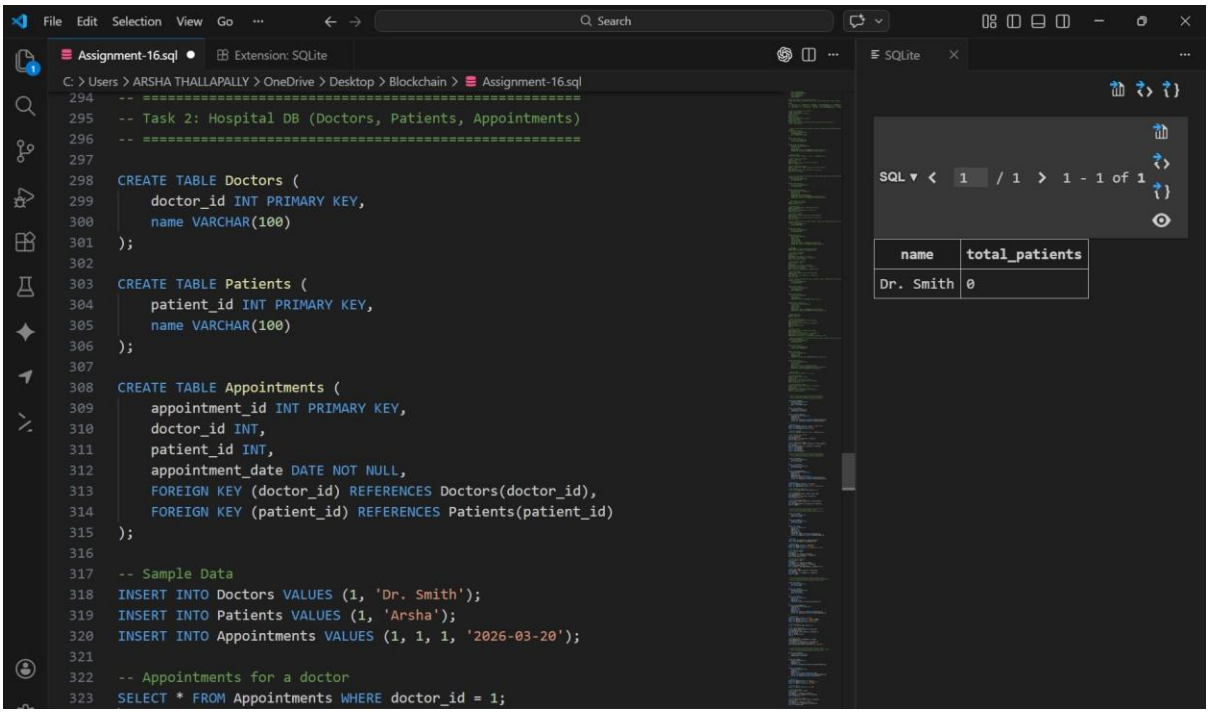
Student DB efficiently manages many-to-many relationships between students and courses using enrollments

Task 2:

PROMPT --Create Hospital DB (Doctors, Patients, Appointments) with constraints and queries for doctor appointments, patient

history, and patient count

Code:



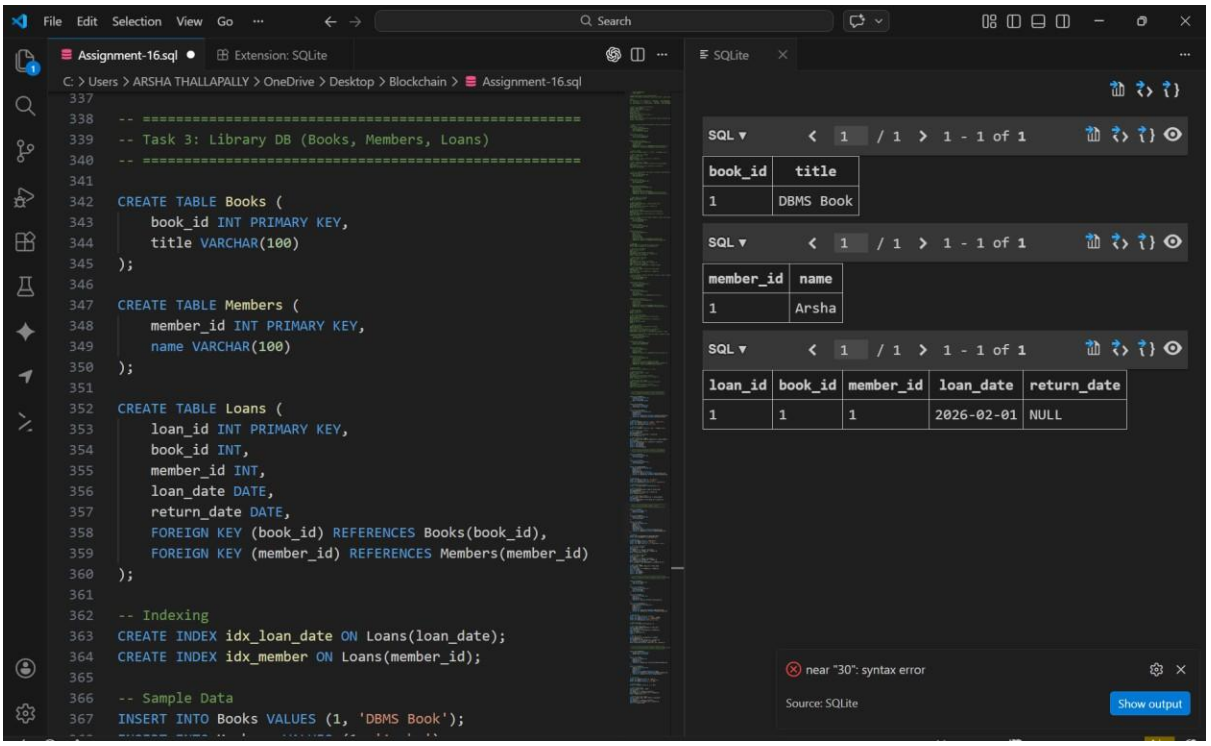
OBSERVATION:

Hospital DB tracks doctor-patient interactions through appointments ensuring structured medical records

Task 3:

PROMPT -- Design Library DB (Books, Members, Loans) with indexing and queries for issued books, overdue books, and books per member

CODE:



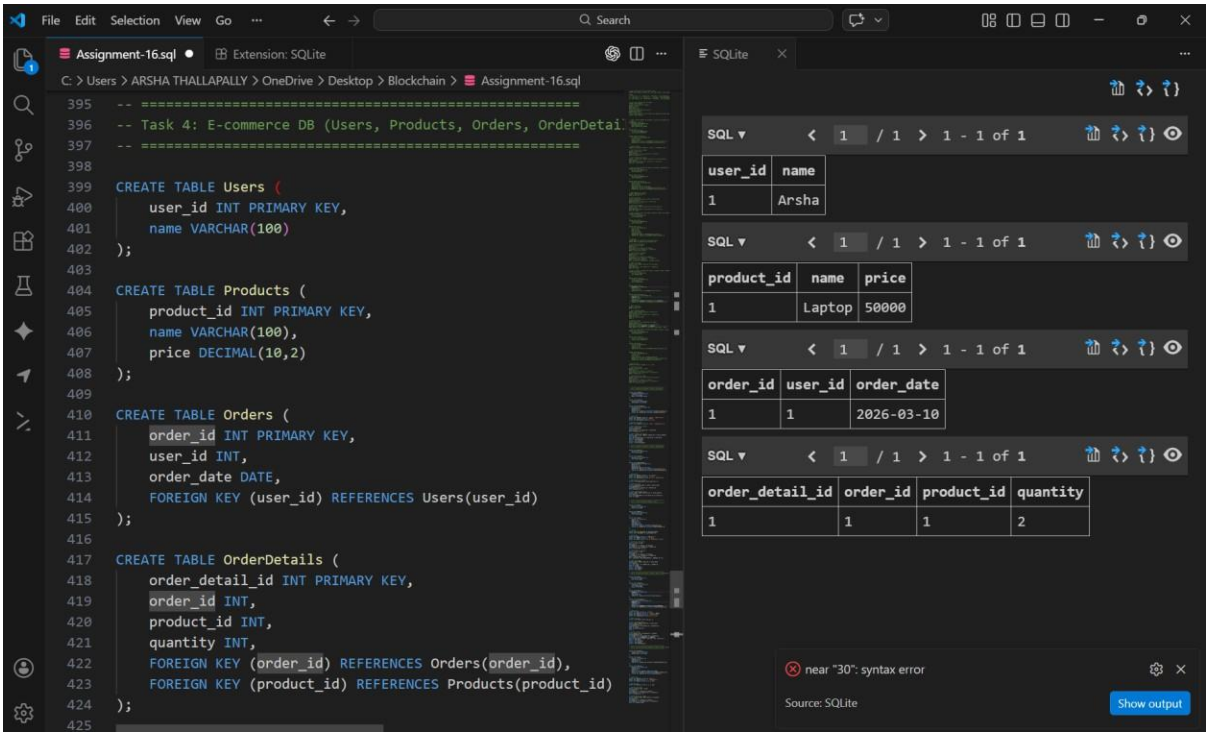
OBSERVATION:

Library DB manages book lending with loan tracking and indexing for faster retrieval

Task 4:

PROMPT: Design E-commerce DB (Users, Products, Orders, OrderDetails) with queries for user orders, most purchased product, and monthly revenue

CODE:



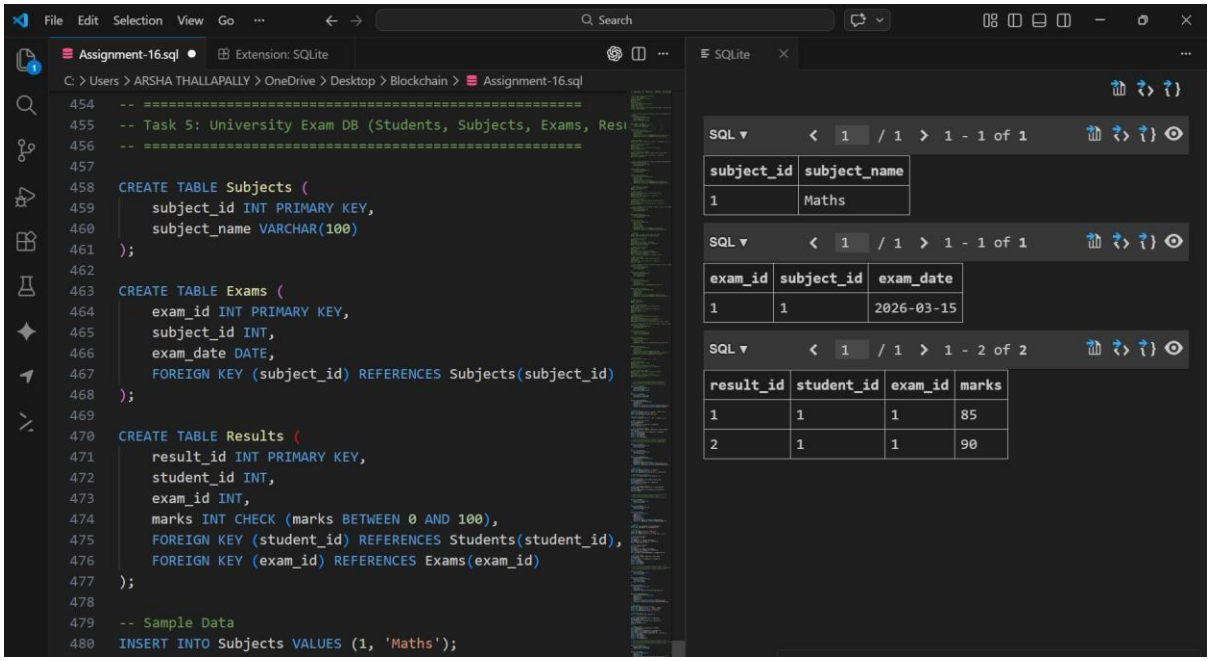
OBSERVATION:

E-commerce DB handles user orders and enables analytics like revenue and product demand

Task 5

PROMPT: Create University Exam DB (Students, Subjects, Exams, Results) with constraints and queries for results insertion, subject marks, and averages

CODE:



OBSERVATION:

University Exam DB stores and analyzes student performance with subject-wise results and averages
